

Egor Vasilenko

Target Position: Data Scientist Intern / ML Engineer Intern / Data Analyst

☎ +7 (996) 776-80-37 | ✉ egor.vasilenko.2004@yandex.ru
📧 @oknelisavroge | 🌐 github.com/KsyLight | 📍 Saint Petersburg

SKILLS

Programming languages: Python, SQL

Python / ML stack: Pandas, NumPy, scikit-learn, CatBoost, XGBoost, PyTorch

Machine Learning: classification, regression, clustering, data analysis, model evaluation, quality metrics

Deep Learning: basic neural network architectures (CNN, RNN, Transformers), fine-tuning embedding models, using embedding and LLM models in RAG systems and agent-based scenarios

Databases and data processing: PostgreSQL, ClickHouse, basic knowledge of PySpark

Applied methods: time series analysis, econometrics, econometric modeling, A/B testing

Mathematics: probability theory, mathematical statistics, optimization methods, linear algebra, calculus

Other: Git, English — B1

WORK EXPERIENCE

Gazpromneft ITO LLC

October 2025 – March 2026

ML Engineer Intern

Saint Petersburg

- Developed a RAG-based service for search and question answering over an internal project registry.
- Worked on search over textual and partially structured data, including project information, statuses, descriptions, and additional attributes.
- **Stack:** Python, embedding models, reranking models, LLM, LangChain, Pydantic, Streamlit, ChromaDB, BM25.

EDUCATION

Saint Petersburg State University of Economics

2022 – 2026

Faculty of Economics, Finance and Information Technology

Saint Petersburg

- **Profile:** Mathematical Modeling and Data Analysis in Economics.
- **Bachelor thesis:** development of an intelligent project information search service based on methods for analyzing textual and partially structured data.

ADDITIONAL EDUCATION

MTS Data Analysts School

2024 – 2025

- Participant and graduate of the MTS Data Analysts School in Data Science. The certificate is available on GitHub.
- Covered Python, SQL, ML, neural networks, Big Data and other topics; completed a final anti-fraud project involving classification and clustering of calls.

Advanced Data Analyst, Yandex Practicum

2024 – 2025

- Data analytics course with a product analytics track. The certificate is available on GitHub.

ACHIEVEMENTS

All-Russian Case Championship “ПроЦифру”

2025

- 1st place in the Gazprom Neft deep learning track. Developed an HR service with an XLM-RoBERTa model fine-tuned on a resume dataset for multi-class classification.

Cup IT 2025, Data Analysis track

2025

- Top 15% of participants, 12th place.
